

Liffe Green Pledge

life

13-24 NOV

Ljubljana, 13 November
2024

The people of Cankarjev dom recognize our responsibility towards the welfare of individuals, society and the environment. We are committed to sustainable events management, to taking positive actions that will help reduce our carbon footprint and impact on the environment while ensuring sustainable performance. Sustainability is at the core of our convictions and an intrinsic part of our day-to-day operations. We commit ourselves to running the Ljubljana International Film Festival – LIFFe in line with the principles of sustainable event organisation, and adopting the Planet Positive Event methodology. In accordance with a holistic approach to sustainable event planning, our commitment extends beyond our festival staff and production team to include our visitors, participants and partners.

Our key sustainability objectives:

Promoting sustainable mobility - we encourage visitors, partners and guests to use environmentally friendly modes of transport

Waste reduction and responsible management - reducing waste, optimising separation and using recycled and reusable packaging.

Digitalisation and lower resource consumption – focus on digital communication and promotion, reducing paper and energy consumption.

Energy efficiency - optimising energy consumption and using energy-saving equipment.

Sustainable food and drink choices - we offer local, seasonal and organically produced food and plan our menu with a view to reducing food waste.

Measuring and reducing our ecological footprint - we measure the carbon footprint of events and work to make improvements.

We recognise that by committing to the principles of sustainability, we can all contribute to a greener future, reduce our impact on the environment and actively create a better world for mankind.

LIFFe organisers are committed to sustainability and will develop a Green Action Plan, to define in more detail our objectives and actions in the following areas:

- Mobility
- Project management
- Communication and marketing
- Event venue
- Ordering services
- Food and beverages
- Hotel accommodation
- Multimedia equipment and production
- Regenerative impacts

We commit ourselves to measuring LIFFe's carbon footprint and use the data to develop targets aimed at its reduction.

Simon Popek
Liffe Festival Director
